

Have you been diagnosed with Ankylosing Spondylitis?

If you are over 18 years of age and have been diagnosed with Ankylosing Spondylitis for more than 3 months you may wish to speak to your doctor about the BUILDER studies.

The BUILDER studies are clinical research studies designed to test an investigational medication in adults with Ankylosing Spondylitis.

To learn more, or to find out if you may be eligible to take part in this study, please speak to your doctor or call the number provided below.
