

# Do you have active RHEUMATOID ARTHRITIS?

## **Are you/have you:**

- between the ages of 18 and 75 years old (male or female)
- been diagnosed with Rheumatoid Arthritis for at least 6 months
- taking Methotrexate for at least 12 weeks and on stable dose (minimum 10 mg/week) for at least 6 weeks prior to the screening visit
- had an inadequate clinical response to drugs such as Enbrel, Humira, Remicade or Cimzia

If so, you may qualify to participate in a Rheumatoid Arthritis research study conducted by CSI Research, Inc.

Qualified participants will receive:

- Study related medical exams at no cost.
- Study related investigational medication.
- Patients who complete the treatment phase will be offered the possibility to enter a long-term extension study
